LEED® GREEN BUILDING RATING SYSTEM

Flexospan Metal Roofing and Siding - **PRODUCT DATA SHEET**

Flexospan - LEED Points Product Data Sheet

LEED® Green Building Rating System

New Construction & Major Renovations (LEED) Version v3, April 27, 2009

The following is provided as general information to assist your LEED project team in better understanding Flexospan products and the characteristics of our materials that may contribute towards earning LEED certification of your project. Because each project has unique circumstances, it is the responsibility of your project team to determine if your project is eligible for certification and whether LEED points will be available for the Flexospan product supplied to your particular project.

NEW BUILDING CONSTRUCTION AND MAJOR RENOVATION

MATERIALS & RESOURCES (MR)

Credit 4 Recycled Content 1-2 Possible Points

According to U.S. Green Building Council® LEED 2009 for New Construction and Major Renovations, the intent of this credit is "to increase demand for building products that incorporate recycled content materials, thereby reducing impacts resulting from extraction and processing of virgin materials." (LEED 2009 for New Construction and Major Renovations, Page 52).

The steel used in Flexospan's panels typically contains an average post consumer recycled content of 28.9%.

This value is based on data from the Steel Recycling Institute publication "Steel Takes LEED® with Recycled Content" (March 2009). Because of unique project circumstances, it is the responsibility of your LEED project team to determine if your project is eligible for certification and whether Credit 4 for Recycled Content points will be available for the Flexospan product supplied to your particular project.

MATERIALS & RESOURCES (MR)

Credit 5 Regional Materials 1-2 Possible Points

Flexospan wall and roof panels are manufactured at Sandy Lake, Pennsylvania.

Because of unique project circumstances, it is the responsibility of your LEED project team to determine if your project is eligible for certification and whether Credit 5 for Regional Materials will be available for the Flexospan product supplied to your particular project.
